INSTRUCTIONS FOR USING OUR STRAP OVERVIEW

HOW TO DETERMINE THE CORRECT STRAP WIDTH - pages 3-4

We specify two measurements for our watch straps: **lug width** and **strap taper**.

The **lug width** is determined by the case of your timepiece. It can be found using the reference number on the case back (e.g., D____.____A). Alternatively, the collection overview on pages 3–4 will help you select the appropriate width.

The **strap taper** describes the width of the strap at the clasp. You select the appropriate clasp according to the second measurement, which is listed in the table as „Strap Taper“ or „Clasp Width.“

Please note: The listed clasp width refers to the respective sales version. When switching to an alternative strap, a different clasp may be required.

If there is no reference number on the case back, it is likely a previous UNION model. In this case, please contact our customer service so we can check the lug width and recommend a suitable strap.

STRAPS - GENERAL INFORMATION

To allow you to quickly and easily change straps for different occasions, selected straps are equipped with a quick-release spring bar system. These are identified by the note „quick-release spring-bars“.

LEATHER, TEXTILE, RUBBER AND SATIN STRAPS - pages 7-43

Our leather straps are handcrafted with the utmost care. We primarily use smooth or embossed calfskin and cowhide, as well as horse and goatskin.

Since leather is a natural product, slight variations in color, texture, or dimensions may occur.

METAL BRACELETS - pages 44- 52

For our stainless steel straps and buckles, we use 1.4435 stainless steel in accordance with EU standards. In addition to high corrosion resistance and robustness, we place particular emphasis on nickel release, which is ten times below the legal limit.

Due to differing case diameters, metal straps with rounded, solid end links are only compatible with the references listed in the description.

Straps with a straight end link can also be used for other models, depending on the strap width.

CLASP - pages 5-6

You will find various clasp options, some in different widths. Please note that some clasps are only compatible with specific straps.

STRAPS AND BRACELETS PRICE LIST 2026 / 2027
